

September 27-29, 2022

Passenger Terminal - Port of Valparaiso, Chile

**TRANS 2022
PORT®**

**VIII INTERNATIONAL
CONGRESS AND
EXHIBITION**

LET'S MEET AT CHILE'S EXCLUSIVE MARITIME & PORT INDUSTRY BUSINESS CENTER

www.trans-port.cl

ORGANIZA Y PRODUCE

Maritime transport is the principal means of transportation in international trade, allowing massive quantities of goods to be shipped at very economical costs. However, adapting port infrastructure to new ship sizes, the capacity requirements of world maritime trade and the subsequent logistical needs for Latin American countries, imply an overall investment -purely in terms of new port infrastructure for containers- of around US \$47,000 million up until 2040. The foregoing reveals a large potential market for new business and enormous business opportunities for sector suppliers, as well as huge challenges for both the public and private sectors, in terms of updating regulations and facilitating the corresponding investment flows within these frameworks.

In such context, TRANS-PORT 2022 - VIII congress and international exhibition for Latin America – is making decisive progress in identifying the various markets that allow projecting the development of this sector; which, in turn, contributes to the economies of the countries of the region, upon convening Chilean and Latin American entrepreneurs, suppliers and authorities in an ideal occasion aimed at the exchange of knowledge, experiences, and technologies, as required by the sector.
